

Functional Requirements Document (FRD)

Planet Fitness & Go Rhino Rewards Integration – White-Label Embedded Experience

Version: 1.1

1. Executive Summary

Planet Fitness and Go Rhino will partner to provide members with attendance-based rewards designed to increase gym engagement, retention, and member satisfaction.

The agreed implementation approach is to integrate a white-labelled Go Rhino rewards experience within the Planet Fitness mobile application. Eligible members will access the rewards experience seamlessly by clicking a **“Redeem Now / Claim”** button within the native Planet Fitness app, which will redirect them to an embedded Go Rhino-hosted rewards portal.

The Go Rhino platform will manage voucher generation, redemption workflows, partner relationships, and reward fulfilment, while Planet Fitness remains responsible for attendance tracking, reward qualification, and native user access.

This approach has inherent integration complexity and ongoing maintenance overhead which could be coupled with consistent support calls to Planet Fitness if members cannot successfully redeem rewards after successfully qualifying for them.

2. Business Objectives

The solution aims to:

- Increase member gym attendance.
- Improve member retention and loyalty.
- Provide tangible rewards for healthy behaviour.
- Leverage Go Rhino's existing voucher and partner ecosystem.
- Adopt development effort through white-labelled integration.
- Enable future reward expansion without significant app development.
- Maintain Planet Fitness branding throughout the member journey.

3. Scope

In Scope

- Embedded white-labelled GoRhino rewards website.
- Attendance-based reward qualification.
- In-app reward eligibility tracking and native redemption triggers.
- Voucher browsing, selection, and mobile-number capturing on the Go Rhino Platform.
- Voucher fulfillment and dispatch directly to members
- GoRhino FAQs and support information.
- Voucher usage monitoring on the Go Rhino Platform.
- Reward volume controls on the Go Rhino Platform.
- Operational reporting.

Out of Scope

- Native voucher management within the Planet Fitness app infrastructure.
- Direct API integrations for voucher delivery.
- In-app SMS or Email fulfillment systems (fulfillment is via Go Rhino platform).
- Partner management.
- Payment processing.
- Third-party booking engines.

4. Solution Overview

The finalized customer redemption journey will operate as follows:

1. **Attendance:** Member attends Planet Fitness clubs.
2. **Qualification:** Planet Fitness determines reward eligibility based on attendance criteria.
3. **Authentication & Trigger:** The customer logs into the Planet Fitness app. Eligible customers will see a “**Redeem Now / Claim**” button.
4. **Redirection:** Once clicked, the customer is securely redirected from the Planet Fitness app to the GoRhino white-labelled rewards site.
5. **Selection:** On the rewards site, the customer browses and selects their preferred rewards partner page.

6. **Verification:** The customer enters their contact number and clicks the “**Claim / Get Voucher**” button.
7. **Fulfillment:** The selected voucher is systematically generated and dispatched directly to the customer via WhatsApp to the contact number they provided.
8. **Support:** Go Rhino support information is accessible within the rewards experience for any troubleshooting.

5. Reward Structure

Reward 1 – Coffee / Smoothie Reward

- **Qualification Criteria:** Member must complete 4 club visits within a single calendar week.
- **Reward:** One free coffee or smoothie voucher.

Reward 2 – Nutrient Voucher

- **Qualification Criteria:** Member must qualify for the attendance threshold defined for the following qualifying week.
- **Reward:** Nutrient voucher.

Reward 3 – Spa Voucher

- **Qualification Criteria:** Member must complete 12 visits within a calendar month.
- **Reward:** R200 Spa Voucher.

6. Functional Requirements

Member Access & Native App Journey

- **FR-001:** Members shall access Rewards through the Planet Fitness mobile application.
- **FR-002:** The rewards experience shall open within an embedded browser or webview.
- **FR-003:** Members shall remain authenticated throughout the rewards journey.
- **FR-003a:** The Planet Fitness app shall display a visible “**Redeem Now / Claim**” button exclusively to eligible customers.
- **FR-003b:** Clicking the “Redeem Now / Claim” button shall securely redirect the user to the GoRhino white-labelled rewards portal without requiring secondary logins.

Reward Eligibility & Selection (GoRhino Portal)

- **FR-004:** Planet Fitness shall determine reward qualification based on attendance activity.
- **FR-005:** Only eligible rewards shall be displayed to members.
- **FR-006:** Members shall be able to view reward qualification status.
- **FR-007:** Members shall be able to view reward expiry information.
- **FR-007a:** The GoRhino white-labelled site shall allow redirected customers to browse all available rewards.
- **FR-007b:** The GoRhino white-labelled site shall provide dedicated landing pages for individual reward partners for customer selection.

Voucher Management & WhatsApp Fulfillment

- **FR-008:** Members shall be able to view available vouchers.
- **FR-009:** Members shall be able to claim vouchers via a “**Claim / Get Voucher**” workflow.
- **FR-009a:** The GoRhino rewards site shall provide an input field for the customer to manually enter their preferred contact number prior to voucher generation.
- **FR-009b:** The system shall require the customer to click a “**Claim / Get Voucher**” button to finalize their selection.
- **FR-009c:** Upon clicking “Claim / Get Voucher”, the GoRhino platform shall instantly dispatch the selected voucher code and instructions directly to the provided mobile number via **WhatsApp**.
- **FR-010:** Members shall be able to view voucher redemption instructions.
- **FR-011:** Members shall be able to view participating partner details.

Support & FAQ

- **FR-012:** The rewards experience shall contain an FAQ section.
- **FR-013:** The rewards experience shall provide support contact details.
- **FR-014:** Partner redemption instructions shall be available to members.
- **FR-015:** Support ownership shall be clearly defined for technical and voucher-related issues.

7. Reporting Requirements

The solution shall support reporting on:

- Reward qualifications (Planet Fitness side).
- Reward claims and selections (GoRhino side).
- Attendance versus reward conversion.
- Monthly reward volumes.

8. Non-Functional Requirements

Performance

- Rewards portal must load within acceptable mobile response times.
- Mobile experience must support Android, iOS & Huawei.
- The automated WhatsApp dispatch system must trigger the delivery of the voucher within a target threshold of the customer clicking "Claim / Get Voucher".

Availability

- Minimum 99% uptime target.
- Planned maintenance windows communicated in advance.

Security & Privacy

- HTTPS encryption required (where applicable).
- **POPIA compliance required.** Special consideration must be given to the protection of the contact numbers entered by users on the white-label form for WhatsApp delivery.
- No unnecessary personal information shared between Planet Fitness and GoRhino.

9. Assumptions

- Go Rhino will host, manage, and maintain the white-labelled rewards platform.
- Go Rhino will maintain a dedicated WhatsApp business integration capable of handling the voucher delivery volume.
- Go Rhino will provide reward content and partner information.
- Planet Fitness will provide attendance qualification data.
- Reward qualification rules may evolve over time.
- Additional reward categories may be introduced in future phases.

10. Success Metrics

The project will be considered successful if:

- Members actively engage with rewards via the Planet Fitness App.
- Gym attendance increases.

- Reward redemption rates meet business expectations.
- Successful end-to-end voucher dispatch to WhatsApp operates without systemic delays.
- Support requests remain low.
- Member satisfaction improves.
- The solution launches successfully by the agreed target date.
